

Webinar on Disinfectant Exposure Reduction and Controls

SARS-CoV2-disinfection guidance for all industries | Disinfectant use in Biopharma Industry and Healthcare Facilities

July 14, 2020, 10:00-12:00 EST

Fee: \$250 (INR 6500 for India)

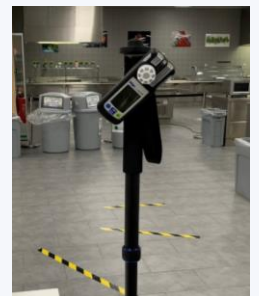

TARGET AUDIENCE - EHS Professionals working in:

- Industries, warehouses, and offices where disinfectants are applied against SARS-CoV-2
- Biopharma industries where disinfectants are applied for room, material, and equipment disinfection
- Hospitals, nursing homes and healthcare facilities

Based on sampling and analysis of 2000+ disinfectant sampling results

TOPICS:

- SARS-CoV-2 disinfection – approaches and methods
- Types of disinfectants used – ingredients and health hazards
- Exposure potential during room, surface, material, and equipment disinfection
- Application of direct reading instruments
- Room re-entry time after disinfection
- Impact of room ventilation, work practices on exposure
- Recommendations on safe disinfectants & work practices
- Respiratory protection for COVID-19 and disinfectants
- Guidance on UV disinfection and COVID-19 surface testing

FACULTY

Maharshi Mehta, CIH, CSP, FAIHA
Global Director, International Safety Systems Inc.

Maharshi has 30+ years of experience in industrial hygiene and has collected and/or analyzed 2000+ disinfectant exposure and area air monitoring results

Brian Petuch, CBSP, RBP, Project Manager,
Bio-Safety, International Safety Systems, Inc.
Brian is Certified Biosafety Professional (CBSP) and Registered Biosafety Professional (RBP) with more than 30 years' experience as Corporate Biosafety Officer with a leading biopharmaceutical firm.
